

# Where do I get software and help with data visualization?

R? SPSS? SAS? Matlab?  
Who can help me choose  
a program to analyze my  
data?

How do I find and  
keep track of all these  
resources?

How do I manage my  
data and share it with  
collaborators?

Where can I find a  
research database for  
my clinical research?

Where can I find a place  
to brainstorm? I need  
technology, whiteboard, and  
comfortable furniture.

Where can I get expert  
help with bioinformatics data analysis?

# DATA

You have questions, we have answers.  
Research Data and Technology Exhibits Fair

10:15 am to 11:15 am Friday, October 25

Jordan Hall Conference Center

Join us for Coffee and a Mid-Morning Snack!
